Technical Skills

- **Programming Languages:** Java, JavaScript
- **Frameworks & Technologies:** Spring Boot, Spring MVC, Hibernate, Microservices Architecture, Angular
- **Databases:** MySQL, MongoDB
- **Web Technologies:** HTML5, CSS3, RESTful APIs
- **Tools:** Git, GitHub, Postman, VS Code, Eclipse, Spring Tool Suite (STS)
- **Core Concepts:** OOP, DSA, Operating Systems, Software Engineering

Education

MCA 2023–2025
Sinhgad Institute of Management, Pune
CGPA: 7.23

B.Sc.(CS) 2019–2022
Commerce, Management Computer Science (C. M. C. S.) College, Nashik
CGPA: 6.83

Soft Skills

- Team Collaboration
- Problem Solving
- Analytical Thinking
- Communication

Achievements

Research Publication Sept 2024
Convergence of IoT and 5G – Research Paper, NIT Mizoram

Full Stack Java Development Certification 2023
Java, Spring Boot, Hibernate, MySQL, REST APIs

LeetCode – Data Structures & Algorithms Practice 2024
Solved 28+ DSA problems covering Arrays, Strings, Recursion, and Searching algorithms.

Profile

Full-Stack Java Developer with 1.5 years of experience building secure and scalable web applications using **Java, Spring Boot, Angular, and REST APIs**. Experienced in **MySQL, MongoDB, JWT authentication, role-based access control**, and performance optimization. Focused on writing clean, maintainable code and delivering high-performance applications.

Experience

Software Developer

Nov 2024 – Dec 2025

Intellisys IT Solution, Pune

- Developed scalable backend services using **Spring Boot** and built secure REST APIs integrated with **MySQL and MongoDB**, improving system efficiency by **25%**.
- Optimized SQL queries, caching, and asynchronous processing to achieve **20% faster API response time** under load.
- Implemented **JWT-based authentication**, role-based access control, payment gateway integrations, and social logins, accelerating checkout flow by **40%**.

Software Developer Intern

Jan 2023 – Jul 2023

Soft Crowd Technologies, Nashik

- Built full-stack applications using **Spring Boot and MySQL**, improving backend performance by **25%**.
- Developed secure REST APIs with **Spring Security and JWT**, enhancing system security and scalability.

Projects

Intellisys HRMS — Spring Boot, Angular, MySQL

- Developed HRMS with Admin & Employee roles, reducing manual HR workload by **30%**.
- Implemented JWT security and optimized database queries, improving performance by **25%**.
- Designed RESTful APIs for employee management, leave tracking, and holiday scheduling to ensure secure frontend-backend integration.

LocalChat — Spring Boot, React Native, Firebase

- Built real-time chat system with Firebase integration, reducing message latency by **35%**.
- Added JWT authentication, social login, and location-based messaging, improving engagement by **40%**.
- Developed scalable REST APIs and optimized backend logic to support concurrent users efficiently.

ProChartist — Spring Boot, React.js, MySQL

- Developed trader ranking platform with secure role-based access.
- Optimized APIs and database queries, reducing response time by **20%**.
- Implemented weekly ranking updates, pagination, and backend validation to ensure accurate and efficient data processing.
